# How to Boost Your Bubble, Powerfully, Using Free, Open-Source Software
by Thomas Sweet (10/3/2020)

1) Take a picture of your bubble and name it Bubble.jpg (or whatever filename you want).

2) Take a picture of yourself, and name it Me.jpg (or whatever filename you want).

3) Put the intentions from the next page into a file named INTENTS.TXT (or whatever filename you want).

4) Put the INTENTS.TXT file and two pictures in the same folder as the intention_repeater.py file.

5) If you are on Windows, and don't have Python3, you can go to Start→Search and type: python3
    and it should install it. Linux and MacOS may need to install from the web.

6) On Windows 10, just double-click the intention_repeater.py to run. On Linux/MacOS, you will need to open a terminal and run: **python3 intention_repeater.py**

7) Run the Intention Repeater (for up to 8 hours), with the options below. Use the name of your INTENTS.TXT file.

Note: Please review the intentions on the next page to make sure they resonate with you before running. Feel free to change as desired.

Contents of INTENTS.TXT (or whatever filename you choose)
